
General Description Features Flir Thermal Imaging Solutions

general description features benefits - steris - general description pre-klenz point of use processing gel is a ready-to-use, neutral ph gel designed to keep soil moist and initiate the cleaning process on reusable surgical instruments and medical devices prior to decontamination. applied at the point of use, the surfactant

general description features - mcubemems - general description the mc3630 is an ultra-low power, low-noise, integrated digital output 3-axis accelerometer with a feature set optimized for wearables and consumer product motion sensing. applications include wearable consumer products, iot devices, user interface control, gaming motion input, electronic compass tilt compensation for

general description benefits and features - maxim integrated - general description the max9947 is an aisg-compliant, fully integrated transceiver. the max9947 receiver offers a typical dynamic range of 20db and integrates a bandpass filter that operates in the 2.176mhz frequency with a narrow 200khz bandwidth. the max9947 transmitter integrates a bandpass filter that

features general description - xlsemi - general description the xl4005 is a 300khz fixed frequency pwm buck (step-down) dc/dc converter, capable of driving a 5a load with high efficiency, low ripple and excellent line and load regulation. requiring a minimum number of external components, the regulator is simple to use and include internal

general description features - diodes incorporated - general description the ap3012 is a high power, constant frequency, current mode pwm, inductor based, step-up (boost) converter. the converter operates at high frequency (1.5mhz) so that a small, low profile inductor can be used. the ap3012 has built-in overvoltage protection (ovp) to allow the device goes into shutdown mode when the

features general description - gdpSPACE - features general description up to 4 channels per 2u box diversity combiner*: pre-d* & postd* form factor 2u rack-mountable chassis noise figure 80 db rf frequencies 2185 mhz to 2485mhz(std) 1700 mhz to 1850mhz(std) 1427 mhz to 1545mhz(std) 100 mhz to 1100 mhz *

general description features - diodes incorporated - general description the az70xx series ics are under voltage detectors with a built in voltage threshold and low power consumption. the az70xx are specifically designed to accurately monitor power supplies. the az70xx use a precision on-chip voltage reference and a comparator to measure the input operating voltage.

general description features - integrated device technology - general description the 8v54816a is a 16-port, bi-directional cross-point clock switch designed for clock distribution in microtca.4 systems. it features 16 bi-directional m-lvds ports. each port can be individually set as input or output. each output port can be connected to any port defined as input. each port features switchable termination (on:

general description features - mcubemems - general description the mc3216 is a low-noise, integrated digital output 3-axis accelerometer with a feature set optimized for cell phones and consumer product motion sensing. applications include user interface control, gaming motion input, electronic compass tilt compensation for cell phones, game controllers, remote controls and portable

general description features - maxlinear - general description the xr16m7701 (m770) is an enhanced universal asynchronous receiver and transmitter (uart) with 64 bytes of transmit and receive fifos, programmable transmit and receive fifo trigger levels, automatic hardware and software flow control, and data rates of up to 16 mbps at 3.3v, 12.5 mbps at

general description features - maxim integrated - general description the maxim icl7106/icl7107 are monolithic analog-to-digital converters (adcs). they have very high input impedances and require no external display drive circuitry. on-board active components include polarity and digit drivers, segment decoders, voltage reference and a clock circuit. the icl7106 will directly drive a nonmulti-

general description features - digi-key - general description the mm74c00, mm74c02, and mm74c04 logic gates employ complementary mos (cmos) to achieve wide power supply operating range, low power consumption, high noise immunity and symmetric controlled rise and fall times. with features such as this the 74c logic family is close to ideal for use in digital systems. function and pin **1. general description 2.**

features - akm - 1. general description ak09918 is 3-axis electronic compass ic with high sensitive hall sensor technology. small package of ak09918 incorporates magnetic sensors for detecting terrestrial magnetism in the x-axis, y-axis, and z-axis, a sensor driving circuit, signal amplifier chain, and an arithmetic circuit for processing the signal from each ...

general description: product features - general description: below deck thermostatic water mixing valve to be used with selectronic™ & metering faucets. asse 1070 certified. adjustable temperature by using a 4mm hex wrench. to decrease temperature, rotate clockwise. to increase temperature, rotate counter-clockwise. model number: 605xtmv1070 recommended to be used with
